Employer Health Services

Welcome!

It is our greatest pleasure to welcome you to Prisma Health Direct Primary Care at Stone and Main. The care team is committed to providing you with the best care possible to suit your needs.

Direct Primary Care overview

Direct Primary Care (DPC) is a comprehensive primary care model that offers unlimited access to a team of Prisma Health health care professionals, delivering high-quality, comfortable, patient-centered care with no additional expenses. Through the lens of value-based care, the DPC model allows for longer appointment times and a more impactful relationship with the provider and care team on staff.

What's included

In addition to all primary care services, a DPC membership covers unlimited access to the care team, formulary of covered labs and prescription medication, care coordination and management.

Pharmacy card

To receive DPC membership benefits, please present your pharmacy card each time you come to any Upstate pharmacy location.

Role of a health navigator

A health navigator will partner with you to ensure your health care experience is positive and to help handle barriers related to work, life or family. The health navigator is trained to provide you with a holistic care approach, positively impacting your health – our top priority.

Can I get in touch with someone when the office is closed?

If issues arise after hours, please call the main phone line (864-522-6550). Staffed 24/7, our care team will be available to provide you with guidance at any time.

Are there virtual care options?

In addition to the integration of an electronic medical record (EMR) system that allows you to seek care across all providers using the same EMR, there is access to MyChart and other virtual care options.

We aim to provide our members with high-quality, comfortable care in a welcoming environment.
