Home Recovery Care

With Home Recovery Care, you receive treatment for your medical condition from the comfort of your own home instead of the hospital. The same Prisma Health doctors and team members you know and trust will still care for you.

What to expect

A doctor will assess you to see if Home Recovery Care is a good option. If so, you will go home with a doctor-directed care plan. A recovery care coordinator will manage your care plan and be your main point of contact. A registered nurse will come to your home and care for you several times a day for the first few days.

Doctors and nurses will oversee your care for up to 30 days. All the necessary equipment you might need – such as an IV, oxygen tank and pulse oximeter – will be set up in your home for you. This equipment also includes a computer tablet that allows you to see and talk to your doctor from your home.

For 24/7 help, please call
864-729-0035.

Your registered nurse will:

- Take your vitals, such as blood pressure, temperature and weight.
- Administer IV medications.
- Help you take your medicines.
- Assist you with pain management.

Your recovery care coordinator will:

- Coordinate and communicate your care with your providers.
- Monitor your vitals daily.
- Address your medication questions.
- Assist in scheduling your follow-up appointments.
- Provide you with health education.

Benefits

- The comfort and convenience of high-quality care in your own home.
- Having the clinical team available to you 24/7 (by phone first and then by other avenues as needed).
- Talking to your doctors and nurses face-to-face without ever leaving your home.
- Use of a computer tablet that allows your providers to check on your progress instantly.
- Having a single point of contact for questions.

Cost

Home Recovery Care is a care model program offered by Prisma Health and is not a program of your health insurance plan. While this is not a program of your health insurance plan, you pay only your share of the cost of services provided to you as set in your insurance plan. Recovery care coordinator services have no additional co-pays.

The computer tablet is provided to you at no cost while you are in Home Recovery Care. However, it must be returned when you are discharged from the program.
